

MINDALIGN

The Mental Health Access Gap

People needing help

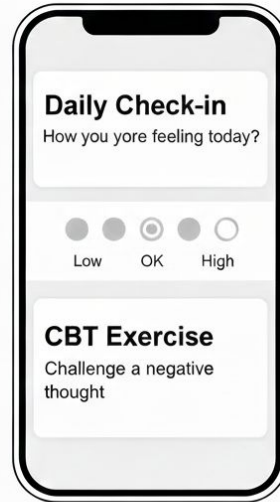

Access Gap

Available clinicians

Long waits, limited sessions.
High-risk users often fall through the cracks.

MindAlign: Proactive CBT Support

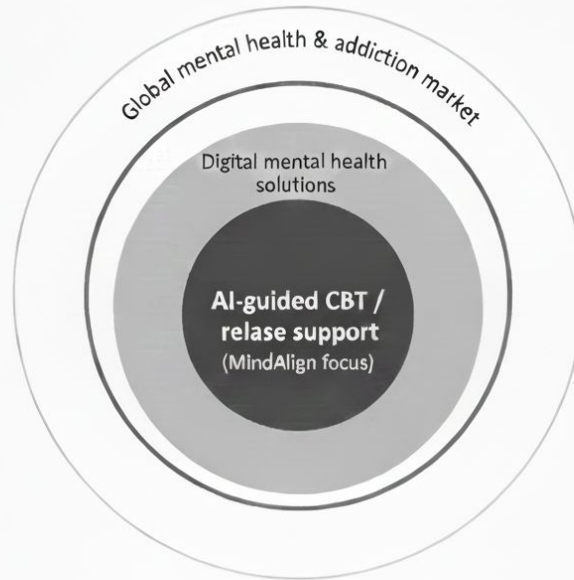

- AI-driven check-ins catch risk early.
- CBT tools support behavior change.
- Clear path to human or crisis help

How the AI Works

- Models assist; humans and hard safety rules decide in high-risk cases.

- Demand for scalable support is soaring.
- Users are comfortable with cha chat apps.
- Employers employers seek cost-effetive solutions.

Ethics and Safety by Design
